- *Tires and wheels*
- *Maintenance*
- *Repairs*

NEW

Low drive-over clearance for easy positioning of vehicles. Oversized platform allows a wide range of pickup points.

Critical components made of stainless steel to provide corrosion protection on high contact wear areas.

Durable, powder coated diamond plate platform

LOW PROFILE - HIGH POWER!

Direct-Lift®

X-FORCE UTV™

2,275 LB. CAPACITY

78" rise height creates working space for the tallest technicians

Pedestal mounted controls

Efficient and easy to use, power units feature a heavy-duty electric 115v motor with single "up" button switch and a single lowering valve release handle. The air operated lock release operates at 90 psi.

Load bearing hinged ramps with polymer rollers allow additional access to perform wheel / brake work. The ramps fold up, lock in place and increase lifting capabilities by extending the pick-up point surface area. Hinged ramps fold 65 degrees down and away, allowing for more access to service vehicle.

Multiple lock positions with negative rake tooth design provides stable support at all heights.

Specifications	X-FORCE UTV
Capacity	2,275 lbs.
Maximum Rise*	78 - 5/8"
Lowered Height	4 - 1/8"
Overall Width	26 - 3/8"
Overall Length	85"
Platform Width	24 - 3/4"
Platform Length	59"
Ramp Length	13"
Distance from Console to Lift (Max)	85"
Motor / Voltage	1Ø 2 HP / 115v
Time of Full Rise	40 seconds
Compressed Air Connection	85 - 110psi

Adapter contact options

Polymer rubber adapter pads are used for vehicle contact. Lift comes standard with a set of four 1-1/2" and set of four 3" flat polymer rubber pad adapters.
